Easy decal application instructions

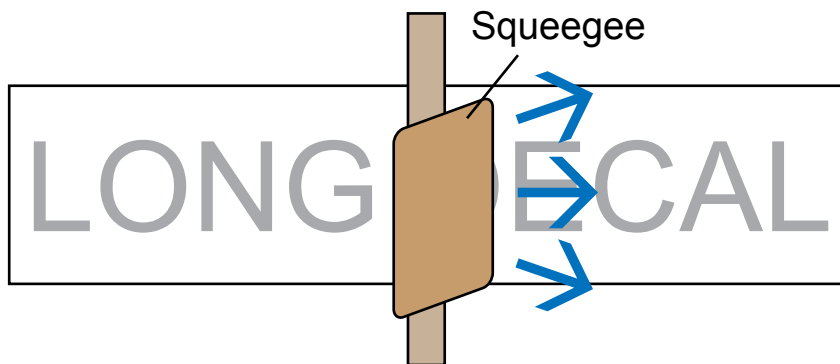

1. Ensure decal is straight and tape it in place where you want it as shown.

2. Lift one side back along tape hinge.

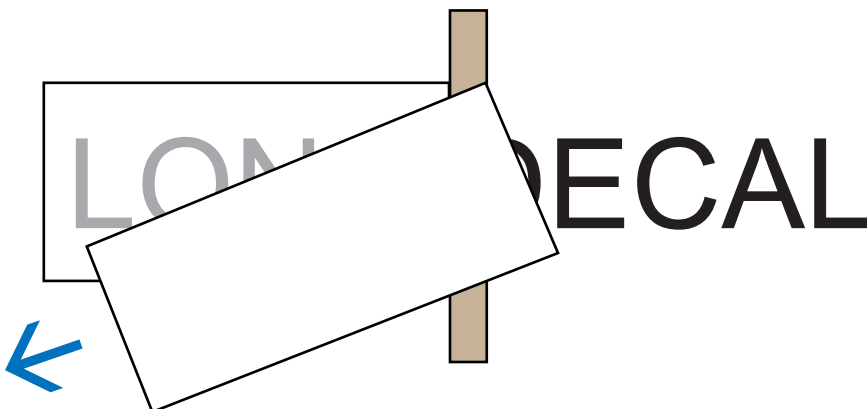

3. Remove backing paper from this side (tear it off at the tape hinge.)

4. Squeegee the decal down from the center outward. Don't allow outer edge to contact surface until you've squeegee'd all the way to the edge.

TIP: Use a credit card, plastic spatula, or similar item as a squeegee.

5. Repeat steps 2, 3, and 4 for the other side of the decal.

6. Remove application tape as shown. Decal will remain on your surface. Pull away slowly at an angle as shown.
